

DanKPay Executive Summary

DanKPay Dispensary Payment Made Easy

Slogan: "Swap UR \$DKBUDS for Buds."

DanKPay is a full-service blockchain-based payment system for cannabis dispensaries.

Problem:

Dispensaries are restricted from using traditional banking, forcing them to rely on cash.

Solution:

DanKPay uses a utility token (\$DKBUD) and a mobile app to scan a QR code at point of sale. The app connects with Phantom Wallet, swaps into \$USDC, and deposits funds into the dispensary's account. Fast. Legal. Seamless.

How It Works:

1. Dispensary POS generates QR code with payment request
2. Customer scans using DanKPay app
3. App swaps fiat \$DKBUD \$USDC
4. Transaction recorded on Solana
5. Funds settle directly to bank

Advantages:

- No cash handling
- Ultra-low Solana fees
- Instant confirmations
- Fully decentralized

Initial rollout: Colorado

Business: DankPay LLC
